Education

2012–2017 **Master of Science, Bachelor of Science** | Indian Institute of Technology Kharagpur
Mathematics & Computing - **7.93/10 GPA**

Work Experience

- Dec 2015– **Open Source Contributor** | Afra: Genome Annotation for the Masses
Present Wrote a test suit for annotation editing functionality on the jasmine framework in JavaScript. Wrote a ruby script to export submission to GFF3 format.
- Sept 2013– **Open Source Contributor** | SymPy: A pure Python Compute Algebra System
Present Fixed the evaluation of ImageSet for intervals, wrote an inequality solver, added `as_set` method for bool and relationals and wrote a Set Difference class. I also made an attempt of implement symbolic Interval Arithmetic which was taken up by Matthew Rocklin as a part of generalised Set Expressions.
- May 2014– **Google Summer of Code Student** | SymPy: A pure Python Compute Algebra System
2014 Rewrote symbolic solvers for Algebraic equations. The new solvers provides a clear input and output interface, removes inconsistency between real and complex solvers and supports infinite solutions.
- Oct 2013– **Team Member** | AGV IIT KGP: Autonomous Ground Vehicle
Sep 2014 Implemented basic motion planning algorithms and basic computer vision system. AGV IIT KGP is a research group at IIT Kharagpur which participated in Intelligent Ground Vehicle Competition(IGVC) 2014 held at Michigan.
- May 2013– **Web Developer** | Breathe Arts | Mumbai, India
July 2013 Implemented a login system using OpenID and fixed the password recovery system on Breathe Art's ASP.NET online art galleries.

Course Work

Mathematics | Modern Algebra, Linear Algebra, Transform Calculus, Discrete Mathematics, Real Analysis, Numerical Solution to Ordinary and Partial Differential Equations, Partial Differential Equations, Probability and Statistics

Computer Science | Programming and Data Structures, Design and Analysis of Algorithms, Computer Organisation and Architecture, Object Oriented System Design
